SECTION C: SPECIFICATIONS/WORK STATEMENT

C.1 SCOPE:

Mayor Gray's Sustainable DC goal for waste management is to achieve zero waste in 2032 by producing less waste in the first place and capturing value from everything else through reuse, recycling, composting and energy production. To achieve this goal the District will develop an integrated solid waste management system that redefines solid waste from a burden that just needs to disappear to a resource with economic, environmental and social value. To determine those values, the District needs to understand exactly what natural and financial capital investments need to be made to sustain the designed system and quantify the benefits that will be realized from its implementation.

The Department of Public Works (DPW) is seeking a solid waste management or engineering consulting firm to develop an evaluation strategy and framework to quantitatively compare the natural and financial capital investments required by three to five alternative integrated solid waste management scenarios (including the current state) that are crafted by the contractor in conjunction with DPW. Each scenario will be designed to capture the energy and imbedded value of the managed material streams and must include recycling, composting and residuals processing components. The contractor will also be required to run each scenario through the designed framework and to comparatively evaluate the results. By quantifying and comparing investments needed for current baseline operations and alternatives, the District will be in a better position to identify impact mitigation, cost savings, value creation and positive environmental justice outcomes

C.2 BACKGROUND

Approximately 900,000 tons of solid waste is currently managed in the District. DPW manages 500,000 tons through its two transfer stations. Roughly 100,000 additional tons are reported as recycled by commercial haulers, and 300,000 tons of municipal solid wastes (MSW) are processed through private sector transfer stations.

DPW collects 135,000 tons per year of solid waste, including 25,000 tons of recyclables and 8,000 tons of leaves from residential properties. DPW collects an additional 50,000 tons of materials through its street and alley cleaning program and citizen drop-off services. District government agencies and contractors servicing government building dispose of an additional 42,000 tons at the transfer stations.

The District's current strategy relies on contracting for all solid waste disposal, recycling, and composting services. The District exports 225,000 tons of solid waste to the Fairfax County Energy Resource Recovery Facility in Lorton, VA. DPW collected recyclables and organics go to Maryland and Virginia facilities for processing. The total annual cost including transfer station operations is approximately \$20 million. The District's agreement with Fairfax County currently expires on December 31, 2015.

Trash received at the private sector transfer stations, as well as some commercial MSW brought to the District's transfer stations, is currently landfilled in Virginia.

The objectives to be achieved from the project are:

- Meet the goals of the Mayor's Sustainable DC plan
- Identify how to economically increase the District's recycling diversion rate
- Determine how DC can best capture the embedded energy and economic value of its waste stream
- Identify the optimal set of components to maximize the value of the waste stream while providing economic sustainability over the long term
- Identify whether the District should seek jurisdictional partners for the solid waste management system.

C.3 REQUIREMENTS

C.3.1 The contractor shall:

- A. Define three to five alternative integrated solid waste management scenarios (including the current state) that capture the energy and imbedded value of the managed material streams. Each of these scenarios must include recycling, composting and residuals processing components.
- B. Develop an evaluation strategy and framework to quantitatively compare the investments required by each of these scenarios. The framework will be an analytic model that compares the component physical, natural, and financial requirements for the current MSW management system (the "baseline) and alternatives.
- C. Identify the relevant physical, natural, and financial assets needed for and used by each alternative.
- D. Input the data derived from baseline and alternatives into the analytic framework to determine a basis of comparison and evaluate the results.
- E. Identify any siting, regulatory, institutional and legal requirements for each alternative.
- F. Design the framework of a public participation process and staff and facilitate stakeholder technical workgroup(s) to provide review and input on the project progress and deliverables.

C.3.2 The contractor shall prepare and submit within one week of contract award a draft project schedule outlining the tasks to be performed and milestone dates. The project schedule will detail the approach and methodology for performing services, including the objectives and data needs. The project schedule shall include key project tasks and milestones including:

- A detailed approach and schedule that complies with the schedule required by DPW
- A project management section, including the task leaders and quality assurance procedures
- A project team organized by task
- An example progress report.

C.3.3 The contractor shall submit the draft project schedule to the CA for review and comment. Upon receipt of comments from the CA, the contractor shall finalize the project schedule within five (5) business days and submit the final project schedule to the CA. The contractor shall update the project schedule as needed during the project and provide the updates to the CA.

C.3.4 The contractor shall submit progress reports, to the CA, on a monthly basis.

- C.3.5 The contractor shall meet with the CA and DPW management staff on a monthly basis to review status, deliverables (including any drafts), scheduling issues and corrective measures, and other matters that must be addressed to ensure smooth delivery of the project.
- C.3.6 Within 270 days after contract award, the contractor shall submit a final report including, but not limited to: results of evaluation of each alternative and any identified siting, regulatory, institutional and legal requirements for each alternative.

L.14 BEST AND FINAL OFFERS

If, subsequent to receiving original proposals, negotiations are conducted, all offerors within the competitive range will be so notified and will be provided an opportunity to submit written best and final offers at the designated date and time. Best and final offers will be subject to the Late Submissions, Late Modifications and Late Withdrawals of Proposals provisions of the solicitation. After receipt of best and final offers, no discussions will be reopened unless the CO determines that it is clearly in the District's best interest to do so, e.g., it is clear that information available at that time is inadequate to reasonably justify contractor selection and award based on the best and final offers received. If discussions are reopened, the CO shall issue an additional request for best and final offers to all offerors still within the competitive range.

L.15 LEGAL STATUS OF OFFEROR

Each proposal must provide the following information:

L.15.1 Name, address, telephone number and federal tax identification number of offeror;

L.15.2 A copy of each District of Columbia license, registration or certification that the offeror is required by law to obtain. This mandate also requires the offeror to provide a copy of the executed "Clean Hands Certification" that is referenced in D.C. Official Code §47-2862, if the offeror is required by law to make such certification. If the offeror is a corporation or partnership and does not provide a copy of its license, registration or certification to transact business in the District of Columbia, the offer shall certify its intent to obtain the necessary

license, registration or certification prior to contract award or its exemption from such requirements; and

L.15.3 If the offeror is a partnership or joint venture, the names and addresses of the general partners or individual members of the joint venture, and copies of any joint venture or teaming agreements.

L.16 FAMILIARIZATION WITH CONDITIONS

Offerors shall thoroughly familiarize themselves with the terms and conditions of this solicitation, acquainting themselves with all available information regarding difficulties which may be encountered, and the conditions under which the work is to be accomplished. Contractors will not be relieved from assuming all responsibility for properly estimating the difficulties and the cost of performing the services required herein due to their failure to investigate the conditions or to become acquainted with all information, schedules and liability concerning the services to be performed.

L.17 GENERAL STANDARDS OF RESPONSIBILITY

The prospective contractor must demonstrate to the satisfaction of the District its capability in all respects to perform fully the contract requirements; therefore, the prospective contractor must submit relevant documentation within five (5) days of the request by the District.

L.19.1 The District considers the following positions to be key personnel for this contract: Project Manager, and Consultants/Analysts.

L.19.2 The offeror shall set forth in its proposal the names and reporting relationships of the key personnel the offeror will use to perform the work under the proposed contract. Their resumes shall be included. The hours that each will devote to the contract shall be provided in total and broken down by task.

SECTION M - EVALUATION FACTORS

M.1 EVALUATION FOR AWARD

The contract will be awarded to the responsible offeror whose offer is most advantageous to the District, based upon the evaluation criteria specified below. Thus, while the points in the evaluation criteria indicate their relative importance, the total scores will not necessarily be determinative of the award. Rather, the total scores will guide the District in making an intelligent award decision based upon the evaluation criteria.

M.2 TECHNICAL RATING

M.2.1 The Technical Rating Scale is as follows:

Numeric Rating	Adjective	Description
0	Unacceptable	Fails to meet minimum requirements; e.g., no demonstrated capacity, major deficiencies which are not correctable; offeror did not address the factor.
1	Poor	Marginally meets minimum requirements; major deficiencies which may be correctable.
2	Minimally Acceptable	Marginally meets minimum requirements; minor deficiencies which may be correctable.
3	Acceptable	Meets requirements; no deficiencies.
4	Good	Meets requirements and exceeds some requirements; no deficiencies.
5	Excellent	Exceeds most, if not all requirements; no deficiencies.

M.2.2 The technical rating is a weighting mechanism that will be applied to the point value for each evaluation factor to determine the offeror’s score for each factor. The offeror’s total technical score will be determined by adding the offeror’s score in each evaluation factor. For example, if an evaluation factor has a point value range of zero (0) to forty (40) points, using the Technical Rating Scale above, if the District evaluates the offeror’s response as “Good,” then the score for that evaluation factor is 4/5 of 40 or 32.

If subfactors are applied, the offeror’s total technical score will be determined by adding the offeror’s score for each subfactor. For example, if an evaluation factor has a point value range of zero (0) to forty (40) points, with two subfactors of twenty (20) points each, using the Technical Rating Scale above, if the District evaluates the offeror’s response as “Good” for the first subfactor and “Poor” for the second subfactor, then the total score for that evaluation

factor is 4/5 of 20 or 16 for the first subfactor plus 1/5 of 20 or 4 for the second subfactor, for a total of 20 for the entire factor.

M.3 EVALUATION CRITERIA

Proposals will be evaluated based on the following evaluation factors in the manner described below:

M.3.1 TECHNICAL CRITERIA (75 Points Maximum)

M.3.1.1 Technical Approach (Total Points Possible: 40 points)

- The Offeror has demonstrated its approach to (1) crafting alternatives for managing the District’s solid waste that maximizes the energy and imbedded value of the managed material streams , (2) developing an evaluation strategy and framework that will quantitatively compare the natural and financial capital required of each alternative (3) identifying siting, regulatory, institutional and legal requirements for each alternative , and (4) designing the framework of a public participation process and staff and facilitate stakeholder technical workgroup(s) to provide review and input on the project progress and deliverables
- The offeror has demonstrated its understanding of the requirements by the proposed management approach, including its project management plan and organizational structure to complete the requirements as stated in the Statement of Work.

M.3.1.2 Technical Expertise (Total Points Possible: 25 points)

The Offeror has described its professional work experience, both firm and individual experiences of each team member assigned to the project, including its experience in collecting, preparing and presenting project plans and recommendations from municipal solid waste collection studies including modeling, statistical evaluation and outcomes of such studies that have been implemented.

M.3.1.3 Past Performance (Total Points Possible: 10 points)

The Offeror has demonstrated its ability to perform the requirements of this RFP by its relevant, successful past performance on similar contracts. Past performance is the assessment of the future performance risk as reflected by actual past and current performance.

M.3.2 PRICE CRITERIA (25 Points)

The price evaluation will be objective. The offeror with the lowest average labor rate for the base period and option years will receive the maximum price points. All other proposals will receive a proportionately lower total score. The following formula will be used to determine each offeror's evaluated price score:

$$\frac{\text{Lowest price proposal}}{\text{-----}} \times 25 = \text{Evaluated price score}$$

Price of proposal being evaluated

M.3.3 PREFERENCE POINTS AWARDED PURSUANT TO SECTION M.5.2 (12 Points Maximum)

M.3.4 TOTAL POINTS (112 Points Maximum)

Total points shall be the cumulative total of the offeror's technical criteria points, price criterion points and preference points, if any.

M.4 EVALUATION OF OPTION YEARS

The District will evaluate offers for award purposes by evaluating the total price for all options as well as the base year. Evaluation of options shall not obligate the District to exercise them. The total District's requirements may change during the option years. Quantities to be awarded will be determined at the time each option is exercised.
